

 **LASTING**

**MERINO & TECHNICAL WORK WEAR & SOCKS**

2021 - 2023

*LASTING SPORT Ltd. is among the most leading and respected of Czech companies with almost 30 years of tradition. Its success in the Czech Republic and abroad is associated with the production and sale of functional underwear and socks made of MERINO wool and other materials. Founded in 1991 in the Czech Republic, the company, with its 50 employees is one of the most traditional European manufacturers of specialized clothing for sports, outdoor and work. The founders and owners of LASTING SPORT Ltd. are a married couple Marta and Jaromír Walter.*

*LASTING initially engaged in the production of socks and functional underwear from technical materials. Fifteen years ago we began focusing on manufacturing functional clothing and socks made of MERINO Wool 16.5 microns. This very fine wool does not scratch and is pleasant to the touch. Our products have received many awards for high quality and functionality. We currently have over 1,000 different products in our assortment and annually produce close to 350,000 pairs of socks and 100,000 pieces of functional clothing in our own factory near Karlovy Vary. This represents a knitting consumption of about 25,000 Kg of merino wool and 25,000 Kg of additional materials per year.*

*We care about the environment. We are a modern and progressive industrial company striving to reduce our carbon footprint. We try to reduce or eliminate any negative impacts of our production. We restrict the use of plastics in packaging materials. Our own photovoltaic power plant, placed on the roof of our building produces 35% of the energy we use this is , in addition to the other mechanisms of conservation we incorporate.*

**Our woolen yarn comes from certified farms in Australia that guarantee the ethical treatment of animals and do not practice mulesing.**

## MERINO SOCKS

-  100% natural
-  High grade permeability
-  Maximum comfort do to excellent moisture elimination.
-  This fine Merino wool will never scratch ot itch.
-  Excellent thermo insulation do to many tiny air bags between fibers.

We have 28 years of experience with manufacturing  **LASTING** socks. Your feet will feel comfortable even under extreme conditions. We look for the best function fibers on the market, test them in cooperation with professional athletes and the result is this catalogue of socks designed for different kinds of sports. Trust us that your feet will be in a dry, warm environment without any bruises or blisters. We use unique technological procedures in manufacturing LASTING socks and that's why our socks are so exceptional.

One important feature of socks recommended for sports, walking and

other physical activities is maximum possible comfort for the entire period that the socks are worn.  **LASTING** socks provide thermal comfort while removing moisture and sweat away from the skin. This minimizes the risk of bacteria proliferation and the occurrence of blisters. A sophisticated reinforcement of the most stressed parts of the foot reduces impacts and minimizes bruising. Elastic bandage of the sole, ankle or border secures a proper position of the sock on the foot even during demanding sports performances. Select socks contain a compression elastic material to increase oxygen flow and accelerate muscle regeneration. Other socks have their tips sewn using a seamless technology so no seam can pinch or rub against the skin.

Both natural and synthetic materials are used for manufacturing  **LASTING** socks. We always emphasize the function and suitable combination of materials as each of them have their own unique properties. Our customers can appreciate that the best quality materials in their ideal proportion are always used.

# MERINO WEAR

## Main reasons for choosing LASTING wool.

- 100% natural
- High - grade permeability
- Maximum comfort do to excellent moisture elimination.
- The fine Merino wool causes no scratching or itching.
- Excellent thermo insulation owing to many tiny air bags between fibers.
- Flat seams ensure a comfort.
- More fire retardant than other materials
- Natural wool fiber is more elastic which ensures comfort.

Common wool, which has a fiber diameter of 30 microns, is uncomfortable for most people. The diameter of the fiber is directly proportional to the level of itching that you feel. Underwear made from merino wool with a fiber diameter of 18 – 22 microns is more comfortable than underwear made from regular wool, but sometimes it still may itch.

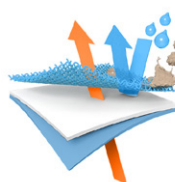

Our clothing is made from carefully selected **SUPER FINE MERINO WOOL** with a fiber diameter of **16 microns**. This is the finest merino wool that breeding farms produce at the moment. Choose the best from nature and enjoy the great properties of wool fibers without the itching.

### Light 160 g

flat fine knitted fabric | 1. layer

Clothing made of this knitted fabric is designed to be worn year - round as a base layer directly on your body. In the spring and summer, it can be utilized as the only layer. This material has an excellent pleasant feel, is very permeable, comfortable and keeps you warm. Thanks to 16 micron merino wool we guarantee no itchiness. It can be utilized in almost any sport and outdoor activity.

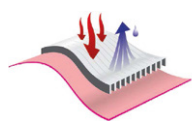

### 3L MERINO MEMBRANE 350 g

100% merino wool 16mc + ePTFE membrane

Three-layer wool laminate, inner and outer layer consists of 100% merino wool 16mc, the middle layer consists of a double-sided laminated micro-porous PTFE membrane. This is made up of several very thin layers creating micropores that are 1000 times smaller than a drop of water and at the same time 700 times larger than molecules of water vapor (sweat). The result is a knit that is waterproof, windproof and breathable at the same time.

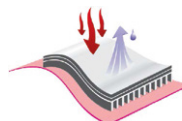

RET (vapor permeability):  
6.5 Pa.m<sup>2</sup>.W-1 (18500 g/m<sup>2</sup>/24h)  
Water column: 4,000 mm

### Medium 230 g

interlock knitted fabric | 1 - 2. layer

Elastic knit from 100% merino wool 17 micron is suitable as the first or mid layer. The interlock knitting guarantees high product elasticity while keeping the benefits of the natural merino wool. The air channels in the fabric improve the insulating properties of the material and improve sweat management. Clothes made from 230 g interlock are characterized by high comfort and functionality.

### Heavy 260 g

double face knitted fabric | 2. layer

Double face knitted fabric is suitable as the second layer in cold weather. Thanks to 16 micron merino wool, we guarantee no discomfort due to itchiness. It can be used in almost every sport and outdoor activity in cold or even freezing weather. This material has an excellent feel. It is very permeable, comfortable but most importantly, it keeps you warm.

**MERVIS INTER**

50 % Lenzing FR® viscose / 50 % Merino wool

Flame retardant functional underwear is made of non-flammable Lenzing FR® viscose and fine merino wool. Lenzing FR® viscose can effectively protect against fire and merino wool transports moisture from the body to other layers of clothing. It keeps the body dry and comfortable. Natural non-flammable material sewn with meta-aramid yarns from Nomex® DuPont™ ensures maximum comfort with a high degree of fire protection.

EN ISO 11612 – Protective clothing – Clothing to protect against heat and flame.

## SEAMLESS UNDERWEAR

Seamless functional underwear with anatomically placed zones ensures breathing and faster sweat vaporization in zones with a higher sweating rate. Perfectly fitting, it supports the functionality and ensures optimum thermo regulation. Minimum seams for maximum comfort and mobility during sporting activities.

MEDIUM

POLYPROPYLENE / COTTON DOUBLE

**DOUBLE**

Functional Thermal Underwear of Double-Layer Fabric  
50 % Polypropylene, 50 % Cotton

It has a high thermo isolating feature in spite of the low weight of the cloth. Plush links of the polypropylene fiber and fine combed cotton yarn ensure maximum thermo isolation in cool and frosty weather and enhanced sweat elimination.

**NECK GAITER**

Lasting neck tubes are multifunctional.

The tubular design can be worn in several different ways - as a scarf, face covering, bandana or headband.

This one is made from a breathable high-stretch fabric that dries really fast. The neck tubes are available in several different colours and patterns.
